

Dalmatian Fire

A Full-Service Fire Sprinkler Contractor

Dalmatian Fire offers end-to-end fire sprinkler system layout, design, fabrication, installation, inspection, maintenance and repair for nearly every type of wet and dry sprinkler system.

Protecting People & Property from Fire —24-hours a Day.

Dalmatian Fire is a full-service fire sprinkler contractor that offers a full suite of fire sprinkler services, including fire sprinkler system layout, fire sprinkler system design, fabrication, and the installation of all types of wet and dry sprinkler systems—including sprinkler systems with pre-action, deluge, foam, CO2, FM200, Energen, and other gas-extinguishing agents.

Dalmatian Fire technicians design and install fire pumps, standpipes, fire water storage tanks, and exterior underground fire main installations. Dalmatian Fire's experts also perform various types of inspections, from wet sprinkler system inspections to foam fire suppression system inspections.

Award-Winning and Life-Changing Safety—by Design.

Dalmatian Fire's corporate award-winning safety program includes:

- » Full-time corporate safety director— Certified Safety Professional (CSP), Construction Health and Safety Technician
- » Comprehensive corporate safety manual
- » Employee safety handbook
- » Annual safety incentive program
- » Video and hands-on safety training oriented to tasks
- » Numerous industry awards and recognition for safety program
- » Safety coordinators in all branch locations and corporate divisions
- » Coalition for Construction Safety (CCS) Certified
- » Dalmatian Fire's parent company, Shambaugh & Son, has an excellent track record that makes Dalmatian Fire exempt from General Schedule IOSHA inspections in the state of Indiana and has been recognized as Voluntary Protection Programs (VPP) participants on projects across America.

A Full Suite of Fire Sprinkler Services. Founded on 100+ Years of Experience.

Fire Sprinkler Design & Installation

Research indicates that a well-designed fire sprinkler system layout saves lives. Dalmatian Fire's AutoCAD and 3D building information modeling (BIM) programs allow experts to create a sprinkler system design that's in accordance with NFPA standards and all other relevant codes. From initial consultation all the way through to project completion, Dalmatian Fire is committed to providing optimal fire sprinkler design on time and within budget.

Fire Sprinkler Inspection

Using full time trained and licensed professionals who perform inspections and sprinkler system maintenance on a daily basis, Dalmatian Fire offers NFPA 25 monthly visual inspections, quarterly sprinkler inspections, annual sprinkler inspections, 5-year sprinkler internal pipe inspections, fire pump testing and inspection, hydrant inspection and testing, and backflow preventer testing.

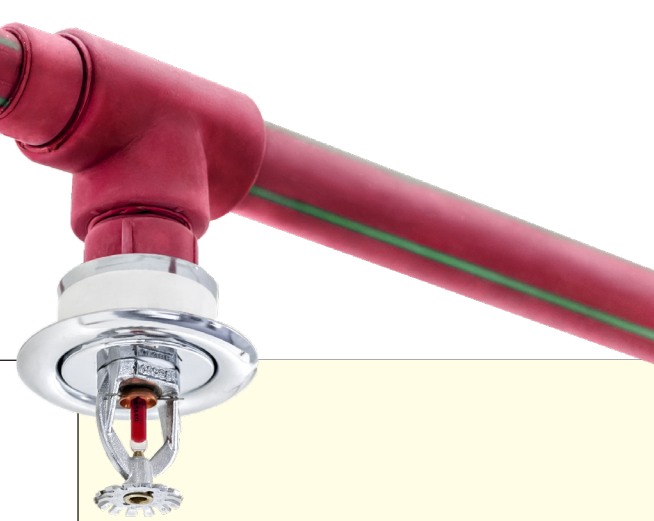

Fire Sprinkler Repair & Maintenance

Dalmatian Fire offers 24-hour service and can handle all fire sprinkler system part orders, repair requests, and maintenance needs. Whether replacing sprinkler heads in fire systems or servicing fire sprinkler water storage tanks, Dalmatian Fire can address all these issues and more.

Backflow Preventer Testing

An unused backflow preventer valve that is not operated periodically may not open when clients need it most. Virtually all sprinkler systems that tie into city water supplies have backflow preventers installed today. The various types of backflow preventer valves and assemblies used are: double check valve assemblies (DCVA), double detector check valve assemblies (DDCVA or DCDVA), reduced pressure zone assemblies (RPZ or RPZA), and reduced pressure detector zone assemblies (RPZDA).

It is a code requirement to have certified backflow testers perform these tests. Dalmatian Fire's inspectors are ALL certified backflow testers and are thoroughly knowledgeable of state standards and codes, including Indiana, Ohio and Kentucky fire codes.
